Subject: RE: ID project transition with Christine leaving ...

It is a good question and I will put it on the OWWET agenda. I have barely thought about the transition other than it is a rough situation for the Office and I think the impacts are not being sufficiently considered. Good that Lidgard has some general familiarity with the OWW issues and Mid Snake in particular. I'll let you know the outcome of the discussion. Thanks for prompting it.

Subject: ID project transition with Christine leaving ...

Dave –

Im sure she/you thinking about it, but before Christine leaves, it would be good to have a transition of senior management knowledge on at least the Mid Snake TMDL, Snake River Hells Canyon TMDL, and possibly others. Any plans to talk with CP to debrief with Mike L, or Cami, or Angela ?
